This Ten-Million-Pounder Walks to Work

The new 8800 is twice as large as any walking dragline in the world. It weighs as much as 3,000 automobiles, handles buckets up to 100 yards, booms to 275 feet. It can dig 12 stories below grade—swing a tenth of a mile—dump on top of a 14-story building. Marion Walkers work in 21 states—in 15 other countries—on five continents. 25 of them went to work in the last 3 years. They are backed by 20 years of the most dependable, low-unit-cost excavating records the world has ever known in stripping, mining and heavy construction. See your Marion Man about the reasons for this preference or write to Marion Power Shovel Company, Marion, Ohio.

A 1-yard Marion 43-M is shown with the Marion 8800 for size comparison.

Marion Power Shovel and "Quick-Way" Crane-Shovel are Divisions of Universal Marion Corp. Marion— $\frac{3}{4}$ to 150 cu. yd. excavators and 21 to 100 ton cranes. "Quick-Way"— $\frac{3}{8}$ to 1 cu. yd. excavators and $8\frac{1}{2}$ to 25 ton cranes.
